## 問 Description

I Size : 5mm (T-1 3/4) Round Type.
I Color : Two Color (Red and Green ).

I Lens color: White Diffused.
I Lead type : Radial leads.

## Main Features

I Instant light less than 100ns turn on time.
I Superior resistance to moisture.
I Low drive current, recommend forward current: $\mathrm{IF}=10-20 \mathrm{~mA}$.
I Cool beam, safe to touch.
I Common Cathode.
I Reliable and rugged.
\| Pb-free

| Absolute Maximum Rating $\mathrm{TA}=25^{\circ} \mathrm{C}$ |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Parameter | Symbol | Rating |  | Unit | Notice |
| Power Dissipation | Pd | Red | 80 | mW | ---- |
|  |  | Green | 75 |  |  |
| DC Forward Current | IF | Red | 25 | mA |  |
|  |  | Green | 25 |  |  |
| Pulse Forward Current | IF (PEAK) | Red | 100 | mA | Duty 1/10 @ 1KHz |
|  |  | Green | 90 |  |  |
| Derating Linear From $50^{\circ} \mathrm{C}$ |  | 0.4 |  | $\mathrm{mA} /{ }^{\circ} \mathrm{C}$ |  |
| Reverse Voltage | VR | 5 |  | V | Under 100uA |
| Operating Temperature Range | T OPR | -30 to +80 |  | ${ }^{\circ} \mathrm{C}$ |  |
| Storage Temperature Range | T STG | -40 to +80 |  | ${ }^{\circ} \mathrm{C}$ | Humidity should be under 50\% |
| Lead Soldering Temperature | TSOL | $260+/-5$ |  | ${ }^{\circ} \mathrm{C}$ | 4 mm (0.157") from mold body Less then 5 Second |

| Part Selection Electrical / Optical Characteristics At TA-25 ${ }^{\circ} \mathrm{C}$ |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Characteristic | Symbol | Test Condition | Color | Min. | Typ. | Max. | Unit. |
| Forward Voltage | VF | IF $=20 \mathrm{~mA}$ | Red | 1.60 | 2.00 | 2.50 | V |
|  |  |  | Green | 1.70 | 2.20 | 2.60 |  |
| Reverse Current | IR | $V \mathrm{R}=5 \mathrm{~V}$ | Red | - | - | 10 | uA |
|  |  |  | Green | - | - | 10 |  |
| Luminous Intensity <br> ( Note 1) | Iv | IF $=20 \mathrm{~mA}$ | Red | 6 | 12 | 24 | mcd |
|  |  |  | Green | 7 | 15 | 30 |  |
| Peak Emission Wavelength | $\lambda_{p}$ | IF $=20 \mathrm{~mA}$ | Red | 635 | 640 | 645 | nm |
|  |  |  | Green | 563 | 568 | 573 |  |
| Spectral Line Half Width | $\Delta \lambda$ | IF $=20 \mathrm{~mA}$ | Red | 25 | 30 | 35 | nm |
|  |  |  | Green | 35 | 40 | 45 |  |
| Dominant Wavelength ( Note 2 ) | $\lambda d$ | IF $=20 \mathrm{~mA}$ | Red | 625 | 630 | 635 | nm |
|  |  |  | Green | 565 | 570 | 575 |  |

## Note:

1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
2. The dominant wavelength $(\lambda \mathrm{d})$ is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.
3. Forward voltage measurement allowance is $+/-0.1 \mathrm{~V}$
4. Luminous intensity measurement allowance $+/-10 \%$
Package Dimensions

NOTES:
I All dimensions are in millimeters (inches).
I Tolerance is $\pm 0.25 \mathrm{~mm}\left(.010^{\prime \prime}\right)$ unless otherwise noted.
I Protruded resin under flange is $1.0 \mathrm{~mm}(.04$ ") max
I Lead spacing is measured where the leads emerge from the package.
I Specifications are subject to change without notice.

NOTE:
I $\theta$ 12/ is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
I Clean only in isopropanol, ethanol, Freon TF (or equivalent).
I When using this product, Please observe the absolute maximum rating and the instructions for use outlined from use of the product, which does not comply with the absolute maximum rating and the instructions included in these specification sheet.
I Q.A Outgoing inspection standard:
Major Defect 0.65 A.Q.L. Minor Defect 1.5 A.Q.L
I Lead Forming:
If forming is required, it must be done before soldering. Form pin leads by securing under 5 mm from body and bedding with radio pliers or the equivalent to avoid pressure on resin. When the LED is mounted into a P.C.board, pitch spacing should be aligned to prevent cause any stress to the resin. Any unsuitable stress applied to resin may break bonding wire in LED, which will cause failure.
I Check at a distance of 30 cm from the LED to the eye defects.
I Over-current-proof:
Customer must apply resistor for protection; otherwise slight voltage shift will cause big current change (Burn out will happen).
I Parallel connection:

Customer must apply series resistor in EACH LED under parallel connection. Otherwise VF

$$
R_{1}=\frac{V_{s}-V_{F 1}}{I_{F}} R_{x}=\frac{V_{s}-V_{F x}}{I_{F}}
$$ tolerance will cause LED array brightness uneven.

I Specifications are subject to change without notice.
